

Romer Labs Update

ICFA 2018: Adrian Rogers

New Romer Facility Tulln

Making the World's Food Safer®

New Australia Sales Manager

Mark Harvie joined Romer Labs in Oct 2018 to expand the "Foodprint" as Regional Senior Sales Manager for ANZ. He graduated with a Degree in Applied Science (Biological & Chemical Technologies). He has worked for almost 25 years in the areas of microbiology, chemistry & allergens - holding senior positions in Laboratory Management, and national sales roles for Laboratory Testing Services, Lab Diagnostics & Consumables.

New AgraQuant Allergen Kits

AgrQuant Mollusc

LOD 2 ppb Tropomyosin (in buffer)

LOQ 10 ppb Tropomyosin

Range 10-400 ppb Tropomyosin

Range 2- 80 ppm Abalone

New AgraQuant Allergen Kits

AgraQuant Brazil Nut

LOD 0.2 ppm Brazil Nut (in buffer)

LOQ 1 ppm Brazil Nut

Range 1-40 ppm Brazil Nut

Range 0.1 - 11.0 ppm Brazil Nut Protein

New AgraQuant Allergen Kits

AgraQuant Coconut

LOD 0.4 ppm Coconut (in buffer)

LOQ 2 ppm Coconut

Range 2 - 30 ppm Coconut

Range 0.1 – 1.0 ppm Coconut protein

New AgraQuant Allergen Kits

AgraQuant Pecan

LOD 0.2 ppm Pecan (in buffer)

LOQ 2 ppm Pecan

Range 2 - 60 ppm Pecan

Range 0.2 – 5.5 ppm coconut protein

Food allergen reference materials

FSA UK Funded project

University of Manchester

LGC

Romer Labs UK

Produce a RM kit, to the principles of ISO 17034,

Food allergen reference materials

food matrix gravimetrically incurred with 5 allergens at clinically and industrially relevant concentrations,

The allergens will be characterised by UoM by discovery proteomics, UoM will also, in collaboration with the European Food Safety Agency (EFSA) co-funded 'ThRaII' project, systematically review appropriate allergen analytical targets

Food allergen reference materials

SKIMMED MILK POWDER,
EGG WHITE POWDER,
ALMOND POWDER,
HAZELNUT POWDER
WALNUT FLOUR.

“The food matrix will be based on a low water activity chocolate dessert paste which has been used for allergen food challenge studies and method comparison”
